General Information

This year's conference is organised in a hybrid system and aims to be a forum for debate on digitisation, sustainability and the application of the latest legislative developments. The event also aims to add an economic and managerial perspective to the realities of finance, bringing together finance professionals, theorists and practitioners alike.

Conference topics

- The impact of digitisation on financial services: opportunities and threats
- The role of regulation in promoting financial sector sustainability
- Health, life, housing insurance and the presence of insurers in the capital market
- ESG in finance: trends and best practices
- Transparency and sustainability reporting in the digitised financial industry
- Green finance and responsible investment in the digital age
- Collaboration between financial institutions and authorities to establish a more sustainable financial sector
- Financial education and sustainability awareness: how can they be integrated in the digital age?
